Severe childhood asthma drastically improved under chiropractic care!!

Darrion started chiropractic care to see if it would help with his asthma. Before coming in, he experienced at least 4 severe asthma attacks every week which left him needing breathing treatment and medications. After his second week of chiropractic care, he started noticing a big difference in his asthma. Over the course of one year, Darrion only had 3 asthma attacks! He is most excited about the opportunity to play basketball since he no longer suffers from severe asthma. Darrion says, “Chiropractic has changed my life forever and I thank them for that!”
