

NO MORE SENSORY INTEGRATION ISSUES!

We are SO grateful to Revolution Chiropractic!
My 8-year old daughter, Natalie, was experiencing severe

Sensory Integration/Overload issues. As a toddler, her struggles had been feeling uncomfortable from tags and socks, etc.

A few months back , these struggles had developed into full blown temper tantrums due to what she called “the itchies”. Triggered by stress and/or the uncomfortable feeling of tags/socks/clothes, her “itchies” would become so out of control that she was having almost daily episodes of extreme rage. The ‘itchies’ were having a very negative impact on both her daily living and, of course, had elevated the stress in our home a lot, too.

I heard from several people that chiropractic care might help Natalie. And Natalie was also experiencing some neck pain as well. So, although my husband and I were a little skeptical at first (it felt a little bit “out there”), we decided to try it. That’s where our wonderful story with Revolution Chiropractic began. Under the compassionate and skillful care of Doctors Jason and Shea, Natalie has had AMAZING results!

We noticed pretty immediately that her fits became less frequent. Now, as I type this, I realize that she hasn’t had a fit at all in over a month. A little over a month ago, we missed our weekly appointment and then a couple of days later she had a pretty bad “itchy” and anger episode. SO, now we don’t miss a week and I’m happy to report that she is back to her happy self and is no longer controlled by ANY “itchy” attacks!

Thank you, Revolution Chiropractic, for putting my precious daughter back on the right track to a happy, healthy life! And for helping bring peace back to our home, too!

With Gratitude!

Sarah Morris
